Eosin 10 %, methanolisch Product code: 11936.xxxxx

Page 1 of 14

# SECTION 1: Identification of the substance/mixture and of the company/undertaking

## 1.1. Product identifier

Eosin 10 %, methanolisch

## Further trade names

This MSDS covers this product in all container sizes.

UFI:

## 1.2. Relevant identified uses of the substance or mixture and uses advised against

## Use of the substance/mixture

Use as laboratory reagent. The product is intended for research, analysis and scientific education.

0S12-E19M-U008-C2Q4

# Uses advised against

Any non-intended use.

## 1.3. Details of the supplier of the safety data sheet

1.4. Emergency telephone	Poison Information Center Mainz, Ge	ermany, Tel: +49(0)6131/19240
Internet:	http://www.morphisto.de	
e-mail:	info@morphisto.de	
Contact person:	Morphisto GmbH	
e-mail:	info@morphisto.de	
Telephone:	+49 (0) 69 / 400 3019-60	Telefax: +49 (0) 69 / 400 3019-64
Place:	D-63069 Offenbach	
Street:	Schumannstr. 142/144	
Company name:	MORPHISTO GmbH	

## number:

**SECTION 2: Hazards identification** 

## 2.1. Classification of the substance or mixture

# GB CLP Regulation

Flam. Liq. 2; H225 Acute Tox. 3; H301 Acute Tox. 3; H311 Acute Tox. 3; H331 STOT SE 1; H370

Full text of hazard statements: see SECTION 16.

## 2.2. Label elements

## **GB CLP Regulation**

Hazard components for labelling

methanol

Signal word:

Pictograms:

Danger

# Hazard statements

H225 H301+H311+H331 H370 Highly flammable liquid and vapour. Toxic if swallowed, in contact with skin or if inhaled. Causes damage to organs.

# according to UK REACH Regulation

## Eosin 10 %, methanolisch

Revision date: 13.02.2023

Product code: 11936.xxxxx

Page 2 of 14

## **Precautionary statements**

P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P241	Use explosion-proof electrical/ventilating/lighting equipment.
P260	Do not breathe dust/fume/gas/mist/vapours/spray.
P280	Wear protective gloves/protective clothing/eye protection/face protection/hearing protection.
P301+P310	IF SWALLOWED: Immediately call a POISON CENTER/doctor.
P303+P361+P353	IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower.
P304+P340	IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P308+P311	IF exposed or concerned: Call a POISON CENTER/doctor.

# 2.3. Other hazards

In case of insufficient ventilation and/or through use, explosive/highly flammable mixtures may develop. The substances in the mixture do not meet the PBT/vPvB criteria according to REACH, annex XIII.

# **SECTION 3: Composition/information on ingredients**

# 3.2. Mixtures

## **Further Information**

Product does not contain listed SVHC substances > 0,1 % according to Regulation (EC) No. 1907/2006 Article 59 (REACH)

## **SECTION 4: First aid measures**

# 4.1. Description of first aid measures

# **General information**

Remove affected person from the danger area and lay down. First aider: Pay attention to self-protection!Remove contaminated, saturated clothing immediately.Remove casualty to fresh air and keep warm and at rest. To supervise the blood circulation. In case of accident or unwellness, seek medical advice immediately (show directions for use or safety data sheet if possible).

# according to UK REACH Regulation

## Eosin 10 %, methanolisch

Revision date: 13.02.2023

Product code: 11936.xxxxx

Page 3 of 14

# After inhalation

Provide fresh air. If breathing is irregular or stopped, administer artificial respiration. Remove casualty to fresh air and keep warm and at rest. If breathing is irregular or stopped, administer artificial respiration. No mouth-to-mouth or mouth-to-nose resuscitation. Use Ambu bag or ventilator. Where appropriate artificial ventilation. Call a physician immediately. In the case of lung irritation: Primary treatment using corticoide spray, eg. Auxiloson spray, Pulmicort-dosage-spray. (Auxiloson and Pulmicort are registered trademarks.)

## After contact with skin

After contact with skin, wash immediately with plenty of water and soap. Take off immediately all contaminated clothing and wash it before reuse. Rinse skin with water [or shower]. Wash with plenty of water. Call a physician immediately.

#### After contact with eyes

After eye contact: Rinse immediately carefully and thoroughly with eye-bath or water. Consult an ophthalmologist. Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Consult an ophthalmologist.

## After ingestion

Rinse mouth immediately and drink 1 glass of of water. Induce vomiting when the affected person is not unconscious. Rinse mouth thoroughly with water. Rinse out mouth, spit out liquid again. Afterwards let drink one glas of water with 100 ml of ca. 40% ethanol (dose for adults). Never give anything by mouth to an unconscious person or a person with cramps.Observe risk of aspiration if vomiting occurs. Call a physician immediately.

## 4.2. Most important symptoms and effects, both acute and delayed

Following inhalation: Cough Dizziness Headache.

Following skin contact: Has degreasing effect on the skin.

After eye contact: Irritation Conjunctival redness. Conjunctival oedema (chemosis). Risk of blindness. In case of ingestion: Risk of blindness. Stomach ache. Indisposition. vomiting. Functional disorders of the CNS and cardiovascular system. Loss of the positioning reflex and ataxia (disturbance of movement coordination) Headaches and dizziness may occur, proceeding to fainting or unconsciousness; large doses may result in coma and death.

## 4.3. Indication of any immediate medical attention and special treatment needed

Treat symptomatically. First Aid, decontamination, treatment of symptoms.

## **SECTION 5: Firefighting measures**

## 5.1. Extinguishing media

## Suitable extinguishing media

Water spray jet, Carbon dioxide (CO2), Foam, Extinguishing powder.

## Unsuitable extinguishing media

High power water jet.

## 5.2. Special hazards arising from the substance or mixture

Highly flammable. Vapours can form explosive mixtures with air. In case of insufficient ventilation and/or through use, explosive/highly flammable mixtures may develop. Concentrated vapours are heavier than air. The vapour of the product is heavier than air and may accumulate below ground level, in pits, channels and basements in higher concentration. Vapours can form explosive mixtures with air. Reignition possible over considerable distance. In case of fire may be liberated: Carbon monoxide, Carbon dioxide (CO2).

## 5.3. Advice for firefighters

Wear a self-contained breathing apparatus and chemical protective clothing. Full protection suit. In case of fire and/or explosion do not breathe fumes. Fight fire remotely due to the risk of explosion.

## Additional information

Use water spray jet to protect personnel and to cool endangered containers. Suppress gases/vapours/mists with water spray jet. Collect contaminated fire extinguishing water separately. Do not allow entering drains or surface water.

according to UK REACH Regulation

# Eosin 10 %, methanolisch

Revision date: 13.02.2023

Product code: 11936.xxxxx

Page 4 of 14

# **SECTION 6:** Accidental release measures

## 6.1. Personal precautions, protective equipment and emergency procedures

## General advice

Remove all sources of ignition. Provide adequate ventilation. Do not breathe gas/fumes/vapour/spray. Avoid contact with skin, eyes and clothes. Use personal protection equipment. Remove victim out of the danger area. Wear personal protection equipment (refer to section 8). Ventilate affected area. Remove persons to safety. Use a positive-pressure air-supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air-purifying respirators may not provide adequate protection.

#### For non-emergency personnel

Ventilate affected area. Clear danger zone. Follow emergency plan. Consult an expert.

#### For emergency responders

Move undamaged containers from immediate hazard area if it can be done safely. Stop leak if safe to do so. Stop and contain spill/release if it can be done safely. If this cannot be done, allow fire to burn under control.

#### 6.2. Environmental precautions

Do not allow uncontrolled discharge of product into the environment. Explosion risk. Discharge into the environment must be avoided. In case of gas escape or of entry into waterways, soil or drains, inform the responsible authorities.

## 6.3. Methods and material for containment and cleaning up

## For containment

Prevent spread over a wide area (e.g. by containment or oil barriers). Cover drains. Collect, embank and pump out. Observe possible material restrictions (section 10).

#### For cleaning up

Absorb with liquid-binding material (sand, diatomaceous earth, acid- or universal binding agents). Treat the recovered material as prescribed in the section on waste disposal. Ventilate affected area.

## 6.4. Reference to other sections

Safe handling: see section 7 Personal protection equipment: see section 8 Disposal: see section 13

# **SECTION 7: Handling and storage**

## 7.1. Precautions for safe handling

#### Advice on safe handling

If handled uncovered, arrangements with local exhaust ventilation have to be used. Do not breathe gas/fumes/vapour/spray. Avoid contact with skin, eyes and clothes. Use extractor hood (laboratory). Provide adequate ventilation as well as local exhaustion at critical locations. Avoid exposure - obtain special instructions before use. Wear personal protection equipment (refer to section 8).

# Advice on protection against fire and explosion

Keep away from sources of ignition - No smoking. Take precautionary measures against static discharges. Vapours can form explosive mixtures with air. Flammable vapours can accumulate in head space of closed systems. Use only antistatically equipped (spark-free) tools. Wear anti-static footwear and clothing Ground and bond container and receiving equipment. Heating causes rise in pressure with risk of bursting. Have fire-extinguishers in readiness before opening containers.

## Advice on general occupational hygiene

Remove contaminated, saturated clothing immediately. Draw up and observe skin protection programme. Wash hands and face before breaks and after work and take a shower if necessary. When using do not eat, drink, smoke, sniff. Contaminated work clothing should not be allowed out of the workplace. Take off contaminated clothing and wash it before reuse. Street clothing should be stored separately from work clothing. Protect skin by using skin protective cream. Always close containers tightly after the removal of product. Ensure cleanliness and dryness in the workplace.

# according to UK REACH Regulation

# Eosin 10 %, methanolisch

Revision date: 13.02.2023

Product code: 11936.xxxxx

Page 5 of 14

# Further information on handling

General protection and hygiene measures: See section 8.

# 7.2. Conditions for safe storage, including any incompatibilities

## Requirements for storage rooms and vessels

Keep container tightly closed. Keep locked up. Store in a place accessible by authorized persons only. Provide adequate ventilation as well as local exhaustion at critical locations. Keep in a cool, well-ventilated place. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Make sure spills can be contained, e.g. in sump pallets or kerbed areas. Ensure adequate ventilation of the storage area.

## Hints on joint storage

Do not store together with: Oxidizing agent. Pyrophoric or self-heating substances. Gas. Explosives. Flammable solids. Pyrophoric liquids and solids. Self-heating substances and mixtures. Substances or mixtures which, in contact with water, emit flammable gases. Oxidizing liquids. Oxidizing solids. Ammonium nitrate and preparations containing ammonium nitrate. Self-reactive substances and mixtures. Organic peroxides. Non-combustible toxic substances. Radioactive substances. Infectious substances.

## Further information on storage conditions

Keep the packing dry and well sealed to prevent contamination and absorbtion of humidity.

Recommended storage temperature: 15-20 °C

Protect against: frost. UV-radiation/sunlight. heat. Humidity. Heating may cause a fire or explosion. Ground and bond container and receiving equipment.

# 7.3. Specific end use(s)

See section 1.

# 8.2. Exposure controls

## Appropriate engineering controls

If handled uncovered, arrangements with local exhaust ventilation have to be used. Do not breathe gas/fumes/vapour/spray. Technical measures and the application of suitable work processes have priority over personal protection equipment. Provide adequate ventilation as well as local exhaustion at critical locations. Use extractor hood (laboratory). Provide washing facilities at the workplace, provide an eye shower or eyewash bottle and mark them. Usual measures for fire prevention.

# Individual protection measures, such as personal protective equipment

## Eye/face protection

Wear eye/face protection. Eye glasses with side protection EN 166

## Hand protection

When handling with chemical substances, protective gloves must be worn with the CE-label including the four control digits. The quality of the protective gloves resistant to chemicals must be chosen as a function of the specific working place concentration and quantity of hazardous substances. For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves. Pull-over gloves of rubber.

Suitable material: Butyl rubber. (0,7 mm)

(penetration time (maximum wearing period): >= 480 h)

The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374 derived from it.

Before using check leak tightness / impermeability.

## Skin protection

Flame-retardant protective clothing. Wear anti-static footwear and clothing Protective clothing.

(flame-retardant)

Minimum standard for preventive measures while handling with working materials are specified in the TRGS 500 (D).

# **Respiratory protection**

In case of inadequate ventilation wear respiratory protection. With correct and proper use, and under normal conditions, breathing protection is not required.

Respiratory protection necessary at:Insufficient ventilation. exceeding exposure limit values Suitable respiratory protective equipment: gas filtering equipment (EN 141). TypeAX. Identification color: brown. Filter type: AX (for group 2 low boilers). In case of a maximum contaminant concentration in inhaled air of 1000 mL/m3 (0.1 % by vol.), group 2 may be used for a maximum of 60 min. In case of a maximum contaminant concentration in inhaled air of 5000 mL/m3 (0.5 % by vol.), group 2 may be used for a maximum

# according to UK REACH Regulation

## Eosin 10 %, methanolisch

Revision date: 13.02.2023

Product code: 11936.xxxxx

Page 7 of 14

## of 20 min.

The filter class must be suitable for the maximum contaminant concentration (gas/vapour/aerosol/particulates) that may arise when handling the product. If the concentration is exceeded, self-contained breathing apparatus must be used. Suitable respiratory protective equipment: Self-contained respirator (breathing apparatus).

# Thermal hazards

Flame-retardant protective clothing. Wear anti-static footwear and clothing . Decomposes when heated. Risk of explosion if heated under confinement. .

# **Environmental exposure controls**

Do not allow to enter into surface water or drains.

## **SECTION 9: Physical and chemical properties**

# 9.1. Information on basic physical and chemical properties

Physical state:       liquid         Colour:       orange-red         Odour:       alcoholic         Metting point/freezing point:       -98 °C         Boiling point or initial boiling point and       64,7 °C         boiling range:       Flammability         Flammability       oft applicable         Gas:       not applicable         Cas:       Not applicable         Lower explosion limits:       Methanol: 36,5 vol. %         Flash point:       Methanol: 36,5 vol. %         Flash point:       Methanol: 36,5 vol. %         Flash point:       Methanol: 9,7 °C         Auto-ignition temperature:       not determined         pH-Value (at 20 °C):       7-8         Viscosity / kinematic:       0,7595 mm²/s         (at 20 °C)       7-8         Viscosity / kinematic:       not determined         value robubility:       miscible. ## **SECTION 10: Stability and reactivity**

## 10.1. Reactivity

Highly flammable.

# 10.2. Chemical stability

Stable under normal storage and handling conditions. Thermal decomposition.

## 10.3. Possibility of hazardous reactions

Oxidizing agents, strong. Alkali metals. Aluminium. Nitric acid. Sulphuric acid. Nitric oxides. Hydrogen peroxide. Barium perchlorate. Lead chlorate. Lead perchlorate. Chromosulphuric acid. Dichlorohexoxide. Magnesium powder. Sodium hypochlorite. Perchloric acid. Permanganic acid. Zinc diethyl. Nitrogen oxides (NOx)Halogenes. Reducing agent. Acids.

# 10.4. Conditions to avoid

Keep away from sources of heat (e.g. hot surfaces), sparks and open flames. Vapours can form explosive mixtures with air. Keep away from heat. Protect from direct sunlight. Keep away from sources of ignition - No smoking. Take precautionary measures against static discharge.

# 10.5. Incompatible materials

Oxidizing agents. Strong acid, Base.Slowly corrodes aluminium and zink under hydrogen evolution. Information is given in subsection 10.3.

#### 10.6. Hazardous decomposition products

In case of fire may be liberated: Carbon monoxide, Carbon dioxide (CO2).

# **SECTION 11: Toxicological information**

## 11.1. Information on hazard classes as defined in GB CLP Regulation

#### Acute toxicity

Toxic if swallowed. Toxic in contact with skin. Toxic if inhaled.

#### ATEmix calculated

ATE (oral) 108,7 mg/kg; ATE (dermal) 326,1 mg/kg; ATE (inhalation vapour) 3,26 mg/l; ATE (inhalation dust/mist) 0,543 mg/l

CAS No	Chemical name									
	Exposure route	Dose		Species	Source	Method				
67-56-1	methanol	Imethanol								
	oral	ATE mg/kg	100							
	dermal	ATE mg/kg	300							
	inhalation vapour	ATE	3 mg/l							
	inhalation dust/mist	ATE	0,5 mg/l							
17372-87-1	disodium 2-(2,4,5,7-tetral	disodium 2-(2,4,5,7-tetrabromo-6-oxido-3-oxoxanthen-9-yl)benzoate								
	oral	LD50 mg/kg	2344	Mouse.						

# Irritation and corrosivity

Based on available data, the classification criteria are not met.

# according to UK REACH Regulation

# Eosin 10 %, methanolisch

Revision date: 13.02.2023

Product code: 11936.xxxx

Page 9 of 14

# Sensitising effects

Based on available data, the classification criteria are not met.

## Carcinogenic/mutagenic/toxic effects for reproduction

Based on available data, the classification criteria are not met.

# STOT-single exposure

Causes damage to organs. (methanol)

## STOT-repeated exposure

Based on available data, the classification criteria are not met.

#### Aspiration hazard

Based on available data, the classification criteria are not met.

## 11.2. Information on other hazards

## Further information

The mixture is classified as hazardous according to regulation (EC) No 1272/2008 [CLP]. Special hazards arising from the substance or mixture!

# **SECTION 12: Ecological information**

# 12.1. Toxicity

The product is not: Ecotoxic.

CAS No	Chemical name							
	Aquatic toxicity	Dose		[h]   [d]	Species	Source	Method	
67-56-1	methanol							
	Acute fish toxicity	LC50 mg/l	15400	96 h	Lepomis macrochirus	ECHA Dossier		
	Acute algae toxicity	ErC50 mg/l	22000		Pseudokirchnerella subca	ECHA Dossier		
	Acute crustacea toxicity	EC50 mg/l	18260	48 h	Daphnia magna	ECHA Dossier		

# 12.2. Persistence and degradability

The product has not been tested.

CAS No	Chemical name			
	Method	Value	d	Source
	Evaluation			
67-56-1	methanol			
67-56-1		76%	20	ECHA Dossier

# 12.3. Bioaccumulative potential

The product has not been tested.

## Partition coefficient n-octanol/water

CAS No	Chemical name	Log Pow
67-56-1	methanol	-0,7

## 12.4. Mobility in soil

The product has not been tested.

## 12.5. Results of PBT and vPvB assessment

The substances in the mixture do not meet the PBT/vPvB criteria according to UK REACH. The substances in the mixture do not meet the PBT/vPvB criteria according to REACH, annex XIII.

# 12.6. Endocrine disrupting properties

according to UK REACH Regulation

# Eosin 10 %, methanolisch

Revision date: 13.02.2023

Product code: 11936.xxxxx

Page 10 of 14

This product does not contain a substance that has endocrine disrupting properties with respect to non-target organisms as no components meets the criteria.

## Further information

Do not allow to enter into surface water or drains. Do not allow to enter into soil/subsoil. strongly hazardous to water. Do not allow uncontrolled discharge of product into the environment.

# **SECTION 13: Disposal considerations**

# 13.1. Waste treatment methods

## **Disposal recommendations**

Do not allow to enter into surface water or drains. Do not allow to enter into soil/subsoil. Dispose of waste according to applicable legislation. Hazardous waste according to Directive 2008/98/EC (waste framework directive). Observe in addition any national regulations! Consult the local waste disposal expert about waste disposal. According to (EWC) European Waste Catalogue, allocation of waste identity numbers/waste descriptions must be carried out in a specific way for every industry and process. Control report for waste code/ waste marking according to (EWC) European Waste Catalogue;

#### List of Wastes Code - residues/unused products

160508 WASTES NOT OTHERWISE SPECIFIED IN THE LIST; gases in pressure containers and discarded chemicals; discarded organic chemicals consisting of or containing hazardous substances; hazardous waste

## List of Wastes Code - used product

160508 WASTES NOT OTHERWISE SPECIFIED IN THE LIST; gases in pressure containers and discarded chemicals; discarded organic chemicals consisting of or containing hazardous substances; hazardous waste

#### List of Wastes Code - contaminated packaging

150110 WASTE PACKAGING; ABSORBENTS, WIPING CLOTHS, FILTER MATERIALS AND PROTECTIVE CLOTHING NOT OTHERWISE SPECIFIED; packaging (including separately collected municipal packaging waste); packaging containing residues of or contaminated by hazardous substances; hazardous waste

#### **Contaminated packaging**

Hazardous waste according to Directive 2008/98/EC (waste framework directive). Handle contaminated packages in the same way as the substance itself. Non-contaminated packages may be recycled.

## **SECTION 14: Transport information**

# **Further Information**

The information is based on the present level of our knowledge. It does not, however, give assurance of product properties and establishes no contract legal rights. The receiver of our product is singularly responsible for adhering to existing laws and regulations. Classification according EC regulation 1272/2008 (CLP): - Classification procedure:

Health hazards: Calculation method.

Environmental hazards: Calculation method.

Physical hazards: On basis of test data and / or calculated and / or estimated.

The above information describes exclusively the safety requirements of the product and is based on our present-day knowledge. The information is intended to give you advice about the safe handling of the product named in this safety data sheet, for storage, processing, transport and disposal. The information cannot be transferred to other products. In the case of mixing the product with other products or in the case of processing, the information on this safety data sheet is not necessarily valid for the new made-up material.

(The data for the hazardous ingredients were taken respectively from the last version of the sub-contractor's safety data sheet.)
